

SAP S/4HANA: Next Generation Business Suite

Why is this a Game Changer?

SAP Business Suite 4 SAP HANA (S/4HANA) is SAP's biggest innovation since the SAP R/3 release, and fundamentally redefines how enterprise software creates value in a digital and networked economy. S/4HANA is a completely reimagined business suite, built to take advantage of the most advanced in-memory technology today, dramatically modernize the user experience on any device, and natively connect to Big Data, the Internet of Things, Business Networks, and more.

What does it enable customers to do?

Reimagine...

Business Models

Connect to people, devices, business networks & big data in real-time, to do things previously unimagined

Business Decisions

Conduct powerful predictive analytics & simulations live during meetings using real-time data

10x Smaller data footprint

Business Processes

Run all processes in real-time, eliminating batch processing

Data Models

Reduce TCO and data footprint, eliminating indices, aggregates, & redundancies

7x Higher throughput

User Experience (UX)

Accelerate user adoption and value attainment with intuitive & personalizable UX for any device

System Deployment

Accelerate deployment with on-premise, managed cloud and public cloud editions combined with easy configuration

1800x Faster analytics and reporting

4x Less process steps

Why SAP?

SAP S/4HANA is built on and for the SAP HANA platform. On top of this revolutionary platform, we leveraged our 40+ years of experience helping over 280,000 customers, to reimagine a business suite designed to deliver instant value for every business function and every industry.
